Hamid Dehghanpour^{1*}, Amenee Eslami²

¹ Faculty Member, Faculty of Cinema & Theatre, University of Art, Tehran, Iran.

² M.A. Student, Faculty of Cinema & Theatre, University of Art, Tehran, Iran.

(Received 5 May 2009, Accepted 22 Nov 2009)

The manifestation of creativity for efflorescence of potential personal capabilities and talents is a thing that many of the new age polymakers, peoples, managers and societies have paid attention to it. The modern psychology, in different ways drives the thirsty man to the inner-calm waters and tries to help the rebellious man reach the restful coast. The new age, encourage the man to reach self-prosperity, discovering of talents, and entering in a creativity road. The artists try creating a modern art in their own unique styles. Most of the scientists believe that the creative process somehow relates to the intact inner of each human, which Eric Berne called it the inner child. Therefore there is a child beyond each creative process, It is ubiquitous. But having communication with this part is not always possible. It requires an inner discovering and search and a travel to unconsciousness of human, a travel which like any travel requires its own conditions, and a travel for which a man is not always ready to go. Many of the theoreticians believe that "creativity" is an intimate and spiritual entity and accessing it depends on having an intact ego. Therefore, according to Quran, "And when I have fashioned him and breathed into him of My spirit, then fall down before him prostrate", it's originated from the spirit of God, who is the origin of creation. This is a discovering travel for entrance of spirit, the inner child, and the moment of connection and communication to the essence and nature of human being. In other view, the child by his extrasensory perceptions and fruitful

imaginary is considered as the origin of creation and recreation. But creativity, will be decreased considerably by the growing up of the child. Now, if a grown up artist can enjoy the creativity and imagine of a child and by executive capabilities of inner adult and expediency of inner parent, he can access efflorescence in creative and creation process. This connection is not possible for a generation, unless establishing a communication with inner child. This child, always is with us, is an integral part of us, and residing in our inner part. A magic child is in us, and to reach the creativity time, we should connect to it, to an innocent and pure section in our inner part. This is a child which is the essence of love, the holy child, the sacred child. Discovering of this inner child is in fact discovering the gate of soul and spirit. The more we are close to this part; the connection is deeper and wisest. The soul of our inner child directs us to the divine essence, to our God, to our inner God, and conducts us to the road of creation, and opens our eyes to our creative inner source to create.

Keywords: Inner Child, Creativity, Children's Art, Soul.
